Science Projects

⇒ **E**ye catching displays will get the interest of others. Make sure titles and headings are clear.

Keept to one or two font sizes and colors - one for headings the other for the rest of the text.

Type and print details so they are easy to read and follow.

Reap the benefits of all your hard work by being able to explain your topic very clearly .

Attention to detail will assure your success, so be sure to check all text and graphics before printing.

Not only, but also...

Credit where credit is due...not only do our GAC students work hard to complete all their GAC assignments and assessments, but they also must complete the Thai national curriculum...and many of them are also very active in other activities at school. From school bands, to chorus, to drama, to debate, to language competitions, to sports competitions, to sports carnivals - and the list goes on. The most recent activity was the National Thai Language Day, celebrated here on Friday 2nd August this year. Students from all three levels of the GAC program were actively involved, along with many others from both Extra and Bilingual classes.

Above are Thanunyapa (12A) drama, Minna (11C) & Ornpailin (11A) MCs, Punat (11B) drama and Jiramate (11C) drama. All fully involved in the activity of the day, and showing the other side of themselves - out of the classroom. We are lucky in that we have some amazingly talented students, who find the time to complete all their studies and participate, at such a high level, in so many other areas of interest to them. Long may they all continue to show their talents and entertain the audiences.
