Parking at Crescent Court 2,
Parking lot near building 6,
Under building 6

Science Education is the foundation of a country's development in areas such as the economy, society, industry and agriculture, as well as technological innovation and application. Setting up the National Science Day Activity is part of our school's efforts to foster skills in use of scientific method and to support positive attitudes to science, realizing the importance of wise use of scientific and technological knowledge for the benefit of our communities and our country as a whole.

This Science Project Exhibition has arisen from collaboration between the Academic Management Department and Junior Secondary teachers in setting up PBL : Project Based Learning. This is an approach to teaching and learning most suitable to 21st century academic and vocational demands. Students practice learning through real working experience such as using technology to search for information, planning, starting to work, communication, solving problems, creative presentation and teamwork. It applies the abilities and interests described in M.I. (Multiple Intelligences) theory used by our school in its educational planning.

On this occasion, the school invites Year 7-9 parents to watch the presentations and by doing so to encourage and affirm your children's efforts. We also invite Year 6 parents who are interested to come and learn more about PBL: Project Based Learning as a way of teaching and learning in Secondary school.

Acknowledgement to join Science Project Exhibition in Junior Secondary (Year 7-9)

On National Science Day, Academic Year 2015

(Please return to homeroom teacher by Tuesday 18th August 2015)
