- **More online learning**
Until further notice...
- **GAC Assessments**
As and when...

Study Wisely

Every online 'MEET' class is important for you to do well in your studies - don't miss any - be active.

Kee your own 'to do' list so that nothing gets forgot or left behind...do things and check them off.

Teachers are available to help, advise and guide you, so keep in touch with them all - all the time.

Relax whenever you can - everyone needs their own down time to chill. Your brain needs a break from your computer and your phone too.

Ask questions every time that something is unclear. You know best when you need help. This is how we better ourselves...gain more knowledge.

Awesome Achievement

Under normal circumstances it is a most major achievement for a student to attain a 4.0 GPA (94%) for their GAC studies across all three years of the program. To manage this when the final level in Y.12 was disrupted with numerous lockdowns, school closures and online learning is just outstanding. It was indeed done by our very own Miss Marilyn Kate Gardner, and she was also the top scoring student in every subject she studied. All teachers are so proud of this, and together with the students, wish her the very best for her future studies at Chulalongkorn University.

Online Success

In these difficult times everyone needs to be even more on task as we continue with online learning. It is a completely new way to be working on tough assignments and research, but it is doable if you put your mind to it.

Welcome to GAC '13'

July 2021 and Ektra welcomes three new classes of students to the GAC program this year. Even though we are starting the year with online learning, the full team of 11 teachers are ready, willing and more than able to support and guide all students through their learning experiences. Be the best you can be by attending all lessons and submitting all your assignments on time - just because you are not in school does not mean you cannot achieve great grades.
