Your Teachers

Enjoy their company and make the most of their skills and expertise.

Keep them updated with your thoughts, dreams and future plans.

Tell them what you think of all your assignments and assessments.

Reach out to them if you are struggling with any of your assignments. They are here to help you.

Ask many questions to further enhance your use of English, and pick-up very important information.

Science Day - 2024

Each year during Science Week, there is the one Science Day when all Y.10-12 students get to show and present their own projects. This allows all the students to show what they have learnt in science, and it also gives them all a great chance to use their best presentation skills when explaining their projects.

On the left from Y.10A we have..Jirayu, Watcharapong, Choabhaya and Jirath who

all explained very well their project on Piezoelectrics.

Then, on the right we have Pitchayapa, Pryn, Natat and Wichapol, also from 10A, who explained and gave a good demonstration of their project which is a device to help people to stay sitting posture perfect..to avoid back problems in the future.

There is a lot of planning and practice which goes into the Science Day activities, and many teachers (and students) put in hours of their own time to make this a success.

The biggest success though is seeing all the students having a great time outside of the classrooms, and being able to tell all their teachers and friends about their projects.

It is also great to see and hear our bilingual students explaining their ideas in both English and Thai (and also some Chinese and Japanese) - an excellent job by all involved.
