2. Changes of Google Classroom's passwords

In the past year, we discovered that number of parents and students forgot passwords re-set on their own or by family members. This year, the school has provided every student with new passwords. The passwords given out are locked and cannot be changed. The password consists of the student's identification number + the first 3 letters of the student's birth month (only first letter capitalized) + an asterisk (*). For instance, the password of a student with the identification number 20123 is 20123Jan*.

Listed below are recommendations for students to get ready for using the Google Classroom.
